

MRE Lesson Plan Development

Each student in the MRE stream of TFE will develop and teach 10 lesson plans as an essential element of their program. Each lesson will consist of approximately 40-60 minutes of class time. Lesson plans must be submitted to your TFE supervisor and the TFE Leadership Team. One of the Case Studies presented in the Integration Seminars must be based on this experience of lesson plan development and teaching.

Each Lesson Plan will follow the format provided below:

1. Title of the lesson
2. Identify learners – age group, women/men’s study group, session, youth, etc.
3. Define learning outcomes
4. Describe the content of the lesson
5. Identify the teaching process utilized
6. Evaluate: what worked well, what would you do differently the next time, what needs to be added or eliminated, what was surprising, what was difficult?

The completed lesson plans should be reviewed with your TFE supervisor prior to be submitted to the TFE Leadership Team by the end of the fall term.
